Abstract of the Disclosure

The present invention provides a method and system for creating a software facility that charts the history and development of software programs. This facility could be located ~~would a location~~ on a global computing network. The facility ~~that~~ would contain a database for storing and maintaining a collection of software programs that span time from the introduction of computers and software beginning in the 1950's to the explosion of various software products being developed today. The intent is for each software program ~~version~~ to be stored in an executable form to enable the separate execution of any program stored in the database.
